Promoting Independence and Inclusion"*

**California's State Wide
Assistive Technology Program**

AT Device Loan Program

CATE provides funding to 10 Community Based Organizations (CBO) throughout the state of California. These CBOs provide direct assistive technology services to persons with disabilities.

They will help individuals learn about, select, locate and "try out" devices most appropriate to their needs.

The CBOs are strategically located to provide comprehensive coverage to all residents of the state.

Each CBO is charged with providing assistive technology related information and referral through the AT Device Loan Program.

A variety of AT devices is available at each location for short-term loans to consumers. The loan program is designed to assist consumers with accessing and utilizing the most effective AT device for their individual needs.

AT Device Reutilization Program

CATE's AT Device Reutilization Program provides a web-based resource center that connects people with available assistive technology.

AT Devices are listed in a "want-ad" type posting and consumers can contact and arrange to obtain the device from the current owner.

Devices can be purchased, traded or donated directly from consumer to consumer.

AT Loan Guarantee Program

CATE's AT Loan Guarantee Program assists persons with disabilities in the purchase of equipment, adaptive aids and assistive devices in order to live more independently.

This statewide alternative financing program offers affordable loans for the consumer with low to middle incomes for the purchase of assistive technology (with the exception of durable medical equipment).
